

Description:

The speech recognition engine server meets the needs of modern conference rooms for saving, environmental protection and convenience. It adopts large-scale language models to intelligently predict the context, intelligent segmentation and punctuation, and format the number, date, time and other content that appear in the results into regular text. It supports real-time subtitles during the meeting, the live broadcast effect, real-time speech transcribing, and quick meeting minutes and other functions.

Specification:

Model	TS-8611
CPU	Core i5-9400 CPU clocked at 2.9GHz-4.1GHz, six cores, six threads
RAM	DDR4 64GB
Hard disk	Enterprise hard disk 1T
Network card	1*Gigabit Ethernet
Video output interface	1*HDMI, 1*DP
Other	7*USB3.1, 1*Type C port, 1*PS/2, 6*audio port
Cabinet	1U rack mount
Dimension	430*250*44(mm)
Working environment	0°C-60°C, 5%~95% (non-condensing state)
Power supply	AC100-240V 250W
