8-channel Serial Port Distributor

TS-9232

Feature:

* 1 channel RS-232 serial port input, 8 channels RS-232 serial port output.
* Input data can be assigned to switch to any one of 8 channels output.
* Baud rate and verified method of output data can be set up.
* With one-channel network interface, support to realize remote control through network.
* It can observe port operation clearly through the indication lights on the panel.
* With high class center control, you can save the cost of port controlling.
* With low voltage power, safe and reliable.
* Standard 19 inch rack installation, 1U height.
* With reset button, it can restore to the default Settings of the factory.

Specifications:

Model	TS-9232
RS-232 Port	3Pin Header;Baud rate: 9600, Data bit: 8, Stop bit: 1, parity bit: none
Network Port	RJ-45,100M
Input Power	~110V-220V 50-60HZ
power Consumption	3W
Installation	With standard cabinet installation stand
Dimension(L×W×H)	484× 245×44mm
Weight	1.2Kg
